

Inclusion and Calculation Rules for Assessment Group Reports

Records included in denominator for performance calculation:

Edit Screen Name	Field Name*	Values Included*
Test Attempted	TstValidFg	Y, E or P
Test Subject	TestSubj	RL, MA, SC, WR, PS (as appropriate)
Enrolled Grade	EnrlGrade	03, 05, 08, 10
Resident School ID	ResdSchlInstID	Institution ID of school
District SPED	DistSPED	N or Blank for school level performance; any value for district level performance
District Duplicate	DistDupFg	Blank

Numerator is the count of test records by performance level (Plg_Tot = D, M or E), with the following exception: Extended assessment results are calculated with the “old” performance standard applied (i.e., students must be tested under standard conditions in order to meet or exceed the performance standard). The “alternate” performance standard applies to AYP performance calculations only. Extended assessment records are identified through the Benchmark code (TstBench = XM, XR, XP, XW, or XS). This makes 2004 results more comparable with 2003 and 2002 assessment results.

*Field Names and Values Included are provided in Student Centered Staging Format for 0304 District Upload, Download, Adjustments and Errors.
